

Rock Tavern to Sugarloaf Upgrade  
Project Update  
July 15, 2021

---

Dear Neighbor,

This letter is to provide you an update on field survey work being taken by the New York Transco (Transco) and its contractors for the Rock Tavern to Sugarloaf Upgrade Project (RTS).

**Project Overview:** RTS will replace and modernize an existing 12-mile 115 kV transmission line in an existing transmission corridor between existing electrical substations in New Windsor and Chester. RTS will also upgrade the existing substation facilities in New Windsor and Chester. RTS will help the State meet key environmental and economic goals by adding capacity to the network to facilitate the flow of clean energy.

**Survey Work Update:** Over the next few weeks, contractors working on behalf of New York Transco will be conducting field survey activities including shovel test pits within the RTS right-of-way crossing or near your property. Shovel test pit surveys are done with hand tools and last less than one day in a typical location. Any land disturbance due to test pits will be restored.

**Contact Us:** Toll-free hotline at 800-314-4236 or email at [questions@RTSupgrade.com](mailto:questions@RTSupgrade.com)

We're committed to working with you. Project updates will continue to be communicated through direct mail and our website at [RTSupgrade.com](http://RTSupgrade.com). Please reach out with any questions or concerns.

Best Regards,

A handwritten signature in black ink that reads "Shannon Baxevanis".
